Crepe Myrtles (Lagerstroemia) Fact Sheet and Guide

Flower prolifically in summer through to March. Colours include white, pale pink, lilac through to cerise and rose red. The tree is vase shaped. In autumn the deep green leaves change from burnt orange through to russet red. A smooth polished bark pinkish brown bark. It tolerates sandy or clay soil and little fertiliser. Needs full sun for good growth and flowering. Lagerstroemia indica grows to about 8m with low upright branches. The "Indian Summer" range is more multi stemmed and more disease resistant.

Name	HxW	Habit	Colour
