Citrus

	Cultivar	Description	Size	Maturity	Height	Notes
Cumquat	Calamondin / Marumi / Australian	Prolific, round fruit.	Small	Mid winter		Excellent for preserves and marmalades
	Nagami	Oval yellow fruit		Autumn and winter	Mid to late winter	Excellent for preserves and marmalades. Eaten whole
Grapefruit	Marsh	Pale yellow with smooth skin. Sweeter than other grapefruit	Large	Late summer and autumn	4.0-6.0m	Virtually seedless. Prefers hot inland areas
	Rio Red	Red blush to the flesh. Sweeter than most grapefruit	Medium	Early to mid winter		
	Thompsons Pink	Few or no seeds	Large	Winter		Ripen on the tree for as long as possible
	Pumelo / Shaddock	Very thick rind, not as sour as some grapefruit	Massive			
	Wheeny	Juicy, seedy, thin skinned fruit. Lemony flavour	Very large			Fruits bi-annually. Tolerates coastal areas and cooler climates
	Ruby Red					
Lemon	Meyer	Roundish, deep golden coloured, thin skin, least acidic		Autumn and Winter	2.0m	Most cold tolerant variety
	Eureka	Relatively few seeds	Medium to large	Autumn and Winter	4.0m	Almost thornless. Can produce small crops throughout the year
	Lisbon	Smooth skinned, juicy, high acid content	Large	Mid winter to early spring	Up to 8m	
	Lemonade	Excellent juice	Medium to large	Mid winter		Can be eaten from the tree
Lime	Tahitian	Mild flavour. Will over-ripen to a yellow skin	Big golf ball	Autumn	3.0-4.0m	Generally seedless
	West Indian	Best flavour	Very small	Through summer and autumn		Suited to tropic and sub-tropics. Thorny
	Kaffir	Useless for juice or rind. Brainy appearance	Medium		3.0-4.0m	Grown for leaves.
	Finger	Finger shaped, fruits pop out when squeezed. Strong limey flavour				Australian native
	Rangpur	Easily peeled and segmented. Strong acidic lime flavour. Orange fruit with mandarin appearance		Late autumn through spring		
	Indonesian	Green becoming yellow when ripe	Very small			
	Australian					

Mandarin	Imperial	Excellent quality fruit, easy to peel, strong flavour	Medium to large			
	Thorny	Very sweet, easy to peel, seedy	Small	Mid winter		Tends to crop bi-annually
	Honey Murcott	Flattish with tight skin and seedy. Distinct, unique taste		Late winter to spring		
	Clementine	Easy to peel, good flavour, few seeds	Medium	Mid winter		
	Emperor	Loose reddish skin with good flavour	Very large	Late Autumn to mid winter	4.0m	
	Ellendale	Juicy and rich	Very large	Early to mid winter		
Orange	Valencia	Easy to peel with good flavour. Best for juicing	Very large	Winter through to late Summer		Seedless variety available
	Lanes Late	Very juicy with excellent flavour. Easy to peel	Large	Late winter		Generally seedless
	Navelina	Sweet and juicy, slightly oblong with dark orange skin		Autumn		Generally seedless
	Blood - Maltese					Cooler climates will produce a redder fruit
	Blood - Arnold		Smallish	Mid winter		Prefers cooler climates
	Blood - Cara Cara	Very sweet. Tends to have pinkish flesh	Large			Navel variety, seedless
	Joppa	Good flavour, not too sweet, very juicy with few seeds	Medium	Mid winter		
	Seville	Sour, sharp and bitter taste		Mid winter		Ideal for jams and marmalades
	Newhall Navel	Oval, very sweet				
	Washington Navel	Very juicy with excellent flavour. Easy to peel	Large	Winter		Generally seedless
Tangelo	Minneola	round bell shaped fruit with a neck. Deep orange to red-orange skin.	Very large			Cross between mandarin and grapefruit
	Seminole	Grapefruit shaped with deep orange skin. Juicy, seedy with a rich sweet flavour	Large	Spring
