## Olive Varieties and their uses

	Oil	Fruit	Origin	Climate	Fruit Size	Fruit description	Maturity	Pollination
Arbequina	✓		Spain	Cold resistant. Crops well in warm climates	Small		Early to mid season	Considered self-fertile
Azpa / Azapena / Sevillana de Azpa				Warm, not frost climate	Medium to very large			
Barnea	✓	✓	Israel		Medium	Can be harvested for green or black table olives	Early to mid season	Prefers Picholine. Picual and Manzanillo can be used
Coratina	✓		Italy	Cold tolerant		Occasionally suitable for green table olives	Late season	Plant with other varieties
Frantoio / Frantoiano / Paragon / Corregiola	✓		Italy	Resistant to extreme cold including snow	Small		Late season	Mostly self fertile. Leccino and Pendolino will increase fruit set
Hardy's Mammoth	✓				Very large		Early season	
Hojiblanca	✓	✓	Spain	Resistant to drought and cold	Large	Harvested black for table fruit	Late season	
Jumbo Kalamata		✓	Italy	Not tolerant to cold	Very Large	Generally harvested green	Early	Mostly self fertile.
Kalamata	✓	✓	Greece	Tolerates warm and cold climates well	Large	Deep black when fully ripe	Late season	
Koroneiki / Coronaiki	✓		Greece	Prefers a warm climate	Very small		Early to mid season	
Leccino / Leccio	✓	✓	Italy	Resistant to extreme cold including snow	Small		Early season	
Manzanillo / Manzanilla	✓	✓	Spain	Crops best in mild climates	Medium to very large	Usually harvested green. Violet black when mature	Early season	Mostly self fertile. Sevillano will increase fruit set.
Picholine	✓	✓	France			Harvested green for table fruit	Mid to late season	
Picual / Nevadillo Blanco	✓		Spain	Prefers cool to cold winters and hot dry summers	Large	Shiny black with flesh turning from light brown to wine pink when ripe	Mid to late season	Considered self-fertile
Sevillano / Gordal		✓		Prefers mild warm climates	Large	Flesh is light green turning purplish black when ripe		Mostly self fertile. Manzanillo will increase fruit set.
Verdale		✓
