*\*A minimum 50% deposit is required to order and secure your stock for winter supply 2018*

*\*Blerick Tree Farm will order your stock on the day that a deposit has been received however we cannot guarantee that our suppliers have sold out or your tree was not supplied due to issues with the crop. This is a rare but unavoidable occurrence. If your stock is not supplied you will be given the option to keep your tree on order for the following year or accept a suitable substitute variety.*

*\*Please be aware that due to the nature of bare root trees, that there can be on average a 10% loss rate which should be taken into account when planting out large numbers. This is a natural occurrence and while Blerick Tree Farm takes every measure to provide you with healthy, well treated trees, we cannot be responsible for any trees that do not strike after planting.*

*\*Excess delivery costs may apply for standard and weeping trees due to their height and bulk*

- Bare Root Planting Guide**
1. Minimise the roots drying out when you transport your trees. If they aren't already in sawdust, keep the roots covered with a wet blanket or sack until planting.
  2. Prune any broken roots before planting. Clean cuts heal faster and will enable your tree to establish faster.
  3. Plant in an oversized hole that has proven to have good drainage. Keep the graft point (if applicable) above the soil level. You should be able to see on the trunk where the soil was when your tree was in the field.
  4. Firmly pack soil around the roots, add some fertiliser and water it in immediately.  
Apply a mulch if desired, leaving the trunk clear.
  5. Prune your trees to an outward facing bud, removing no more than one third of the branches. This step can also be carried out at the nursery if you would like it done for you.
